Are you a candidate for a Cessna Aircraft and 100% Bonus Depreciation in 2011?

Consider the following scenario:

You (or your employee) leave home on a Sunday afternoon, drive an hour to the airport, go through security, make a connection flight and arrive at the destination for a two-hour business meeting on Monday at 11.00am. You arrive home around midnight after the kids are in bed Monday evening.

Consider the alternative:

You leave home on Monday morning at 7.00am, drive to the local general aviation airport, board your personal aircraft piloted by a professional pilot. You polish up your PowerPoint presentation during the three hour flight. After the meeting, you board the plane and arrive home by 5.30pm for your child's little league game.

Do you have trouble retaining key employees because of quality of life issues relating to business travel? Have you reviewed your travel and entertainment budget? Are you looking for ways to trim expenses relating to meals, hotel, rental car and airfare? Does your business travel take you to small towns like Prescott or Payson, Arizona?

Cessna Model	Turbo 182	Turbo 206	Corvalis TTx
Purchase Price	432,800	585,000	735,000
Potential Tax Deductions - Depreciation	432,800	585,000	735,000
Potential Income Tax Savings – Depreciation *	173,120	234,000	294,000

Welcome to the possibility of solving many of these problems with a personal general aviation aircraft while realizing a tremendous income tax benefit. You can

purchase a state of the art Cessna Aircraft, hire a professional pilot (or fly it yourself), expand your business, provide better customer service, improve the morale of your employees, and realize significant income tax reduction come in 2011.

- This illustration assumes the combined federal and state income tax rates of 40% and 100% business use in 2011.
